2025 Catalogue
Professional Products

THE NEW BEKO PROFESSIONAL RANGE

OUTSTANDING **PERFORMANCE** AND ROBUST **DESIGN**

Professional Range

A wide and complete line of professional products, designed to provide excellent solutions that fully satisfy the needs of both the professional catering and hospitality segments. The professional range includes products for cooking, refrigeration, ice making, warewashing, laundry, and ironing.

Discover the whole range of Beko Professional Products

SUPERIOR QUALITY

All the professional products are built to last with a reliable structure and high-quality components, while meeting the highest safety standards according to Beko Professional's rigorous specifications.

SIMPLICITY OF USE

Beko Professional continuously invests in innovation to develop advanced and intuitive technologies, capable of offering excellent performances and maximum results with the minimum effort, by making professional life easier and more rewarding.

FLEXIBILITY

The Beko Professional range of professional appliances includes a wide variety of models, sizes, functions and advanced technologies, capable of satisfying every need and guaranteeing perfect results.

Professional Laundry

The Beko Professional range of laundry appliances addresses the needs of small and large laundry facilities

The range consists of washing machines and tumble dryers, with either medium and large load capacity. They are designed for maximum reliability and durability, ensuring they can withstand the toughest environments.

Professional Washers and Dryers designed for long-lasting, heavy-duty use

Explore the Premium collection

The perfect combination of functionality, reliability and top-quality results for making your working life easier. Ideal for small businesses laundry solutions requiring stronger and faster than standard domestic appliances.

Premium washer with Silent Motor and new Steam Finishing Treatment

The best washing performance with low consumption and guaranteed hygiene in the most silence way.

Premium Design

Premium details, elegant chrome finishing and knob. Big Porthole and flawless console.

LCD USER INTERFACE

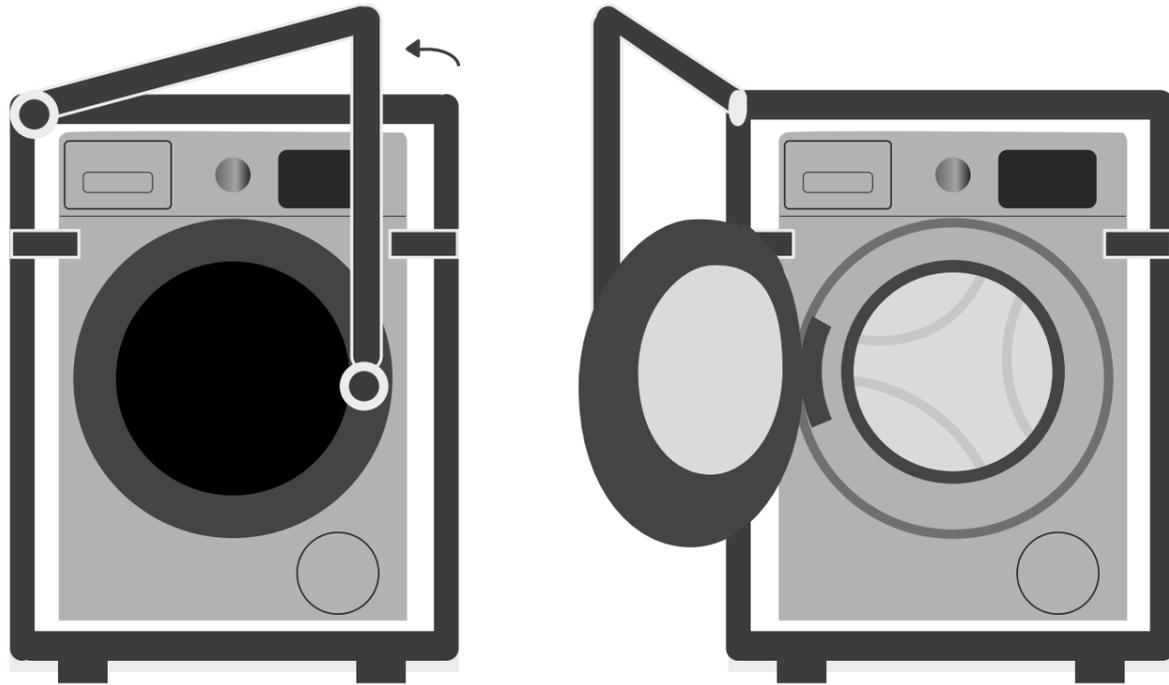

Modern and intuitive, pleasant to use and to look at. From the LCD Display it is possible to select a large variety of cycles and options and get much information, available in different languages.

Robustness & safety

EXTRA LONG LIFETIME TESTED TO BE MORE DURABLE THAN A STANDARD WASHER

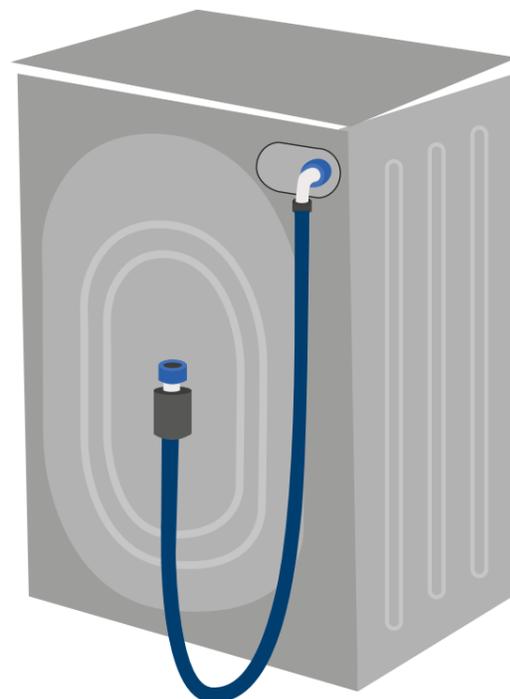

Built to bear all the electrical and mechanical safety tests required by the Machinery Directive 2006/42/EC. Thanks to the sturdiness of its components, it's engineered to perform up to 5.000 cycles without any problem. The Life Cycle Test has been done with the Rinse & Spin cycle, the most stressful for the machine.

FULL AQUASTOP PROTECTION DEVICE

Equipped with the most effective anti-flooding system made of a double inlet house and a tray on the base of the machine which collects the water in case of breakage while a sensor blocks immediately the incoming water.

Extreme safety, in case of breakage there is no fear of flooding and the machine automatically stops functioning.

Enjoy the silence

SILENT TECHNOLOGY

ZERO VIBRATION, ABSOLUTE SILENCE (A class noise)

The Premium washer features the innovative Direct Drive motor, which is directly attached to the drum without the traditional belt, delivering outstanding cleaning results while minimizing noise and vibrations. Thanks to the direct rotation, the set of movements determined by the load and selected program are more precise, meaning optimized energy efficiency and improved steadiness.

SILENT SIDE PANELS & BODY STRUCTURE

The washer is designed to be silent in every part, and the structure is no exception. The washing machine features the innovative Silent Side Panels that minimize spinning vibrations and reduce noise propagation in every direction and at any frequency during the spinning phase, thanks to the special design of the panels. To further improve stability and noise reduction, the panels are joint together in a robust, single-pieced, U-shaped case.

Instead of one component for each of the 4 sides, Beko Professional has developed one single U shaped part for the rear and lateral sides.

This allows:

- A much more robust case
- Minimized vibrations
- Reduction of horizontal, vertical and circular noise propagation

Resources saving

ECO PROGRAM, AN ECOLOGICAL CHOICE

The washing machine is equipped with ECO program, with temperatures from 40°C to 60°C. This cycle uses less energy and water than traditional washes, helping to reduce environmental impact. It's ideal for cotton, synthetics and delicate garments and with excellent performance of soil removal.

HOME
INCLUDES THE
PLANET
WE LIVE ON

RECYCLING

Saving resources does not end with the washer lifetime. 87% of the components of the Premium washer can be potentially recycled after the usage.

Recycle part amount	120
Unrecyclable part amount	17
Total part amount	137
Rate of recycle part	87.6%

The best hygiene & garment treatment with the steam

This treatment is tested and Certified by Allergy UK.

STEAM HYGIENE OPTION

Forget bacteria. Pure, perfect cleaning become effortless. When Steam Hygiene is activated, laundry get sanitized by a hot steam flow at the end of the cycle. Air at 70°C/80°C fill the drum for 30 minutes, neutralizing up to 99,9% of Bacteria with no chemicals, in a powerful and natural way. A deep sanitizing action that guarantee ultimate hygiene for the laundry. It's the optimal option for small business, such as care homes, sports and fitness club, hotels & B&B, where cleanliness and hygiene are vital to prevent contamination and the spreading of germs.

STEAM FINISHING OPTION

This option is designed to keep the 100% freshness of the garments up to 6 hours after the cycle is over. Innovative Steam Finish System takes care of the load inside the washing machine with delicate steam and tumbling action; it gently massages the laundry with regular slow movements alternate with steam actions, this keeps garments fresh for hours after the cycles is over and inhibits the proliferation of the bad odours.

STEAM REFRESH 20' CYCLE

This programme refreshes garments by removing bad odours and relaxing the fibres. The "Steam Refresh 20'" programme makes ironing easier.

ANTI ALLERGY CYCLE

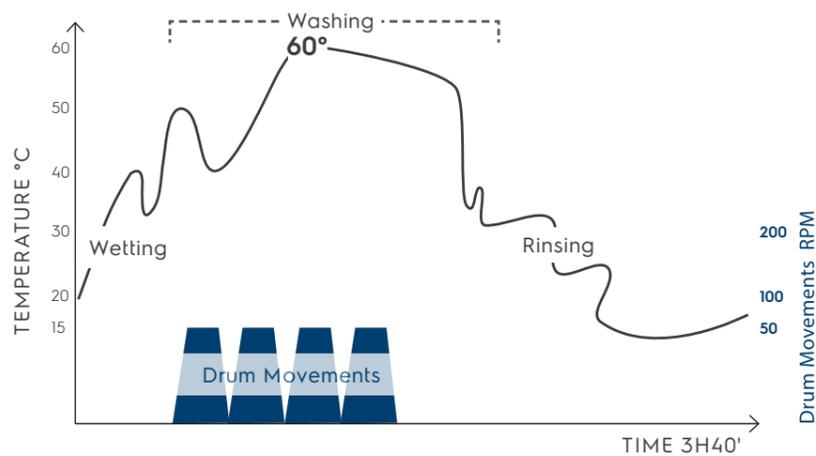

This special program is designed to eliminate all the detergent traces and 99,99% of pollens, house dust mite, pet hair, all causes of allergies. Thanks to the high temperature at 60°C kept for at least 30 minutes, together with many final extra rinses, is the most effective solution to protect the skin. Ideal for environment such as care homes and nursery schools that must be always clean and safe because children are susceptible to all types of illness.

This treatment is tested and Certified by Allergy UK.

PERFECT ELIMINATION OF DETERGENT TRACES AND ALLERGENS

- **Intensive mechanical** action kept at 60°C for more than 30' which eliminates the most common allergens like house dust mites, pollens and cat & dog hair.
- **2+3 extra final rinses** with cold water (3 more than an ordinary programme); this cycle guarantees an excellent rinsing phase to remove all the detergent traces.

On top, the Premium washer with its CUDDLY TOYS cycle is the ideal product for the kindergardens, a specific programm studied to remove dust from the cuddly toys while preserving its delicacy and shine of the air.

ANTI STAIN QUICK CYCLE

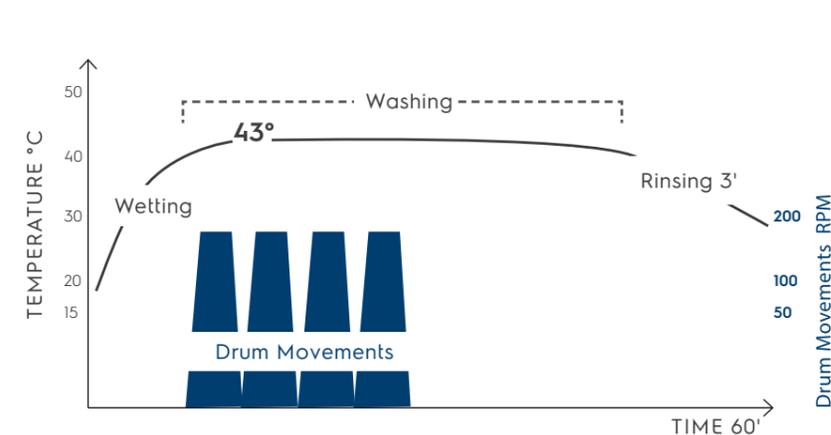

Through the More Cycle selection there is a set of very specific useful cycles, including the Quick Anti Stain Cycle, able to remove more than 100 stains in just one hour. It is the perfect washing programme for business with a rapid turnover of tablecloths and towels that need to be washed quickly and effectively.

100 STAINS*

- Grass
- Tea
- Balsamic vinaigrette
- Eyeshadow
- Hamburger grease
- Meat sauce
- Egg
- Sebum
- Blood

THE PERFECT COMBINATION FOR FULL REMOVAL OF STAINS

- **Rapid heating phase up to 43°C** for improved detergent activation. Perborate activates above 40°C.
- **Intensive mechanical action** to optimally remove the stains and temperature resetting to keep the temperature constantly at 43°C for longer.
- **2 final rinses** with cold water and a final spin cycle.

*The selected spots are only the most representative of all the spots removed.

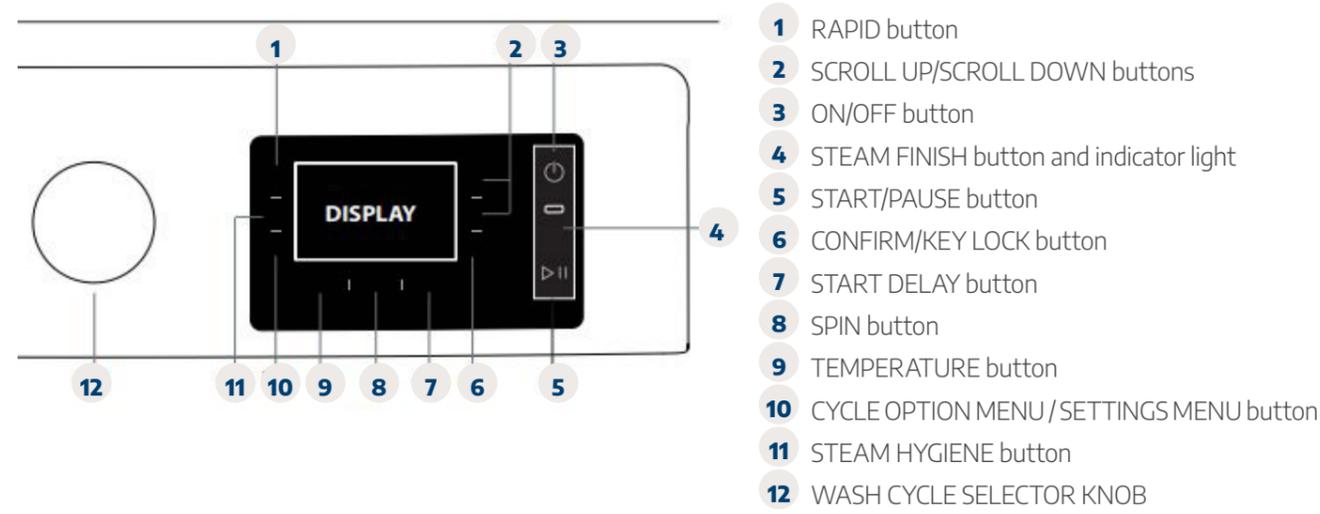

Premium User Interface

The new Premium washer offer the possibility to use a vast variety of cycles and options, suitable for every need. Modern and intuitive user interface, for a user experience without any difficulty.

CYCLES

	Mixed Extra Silence	More Cycles		Eco 40-60

3-Dimensional Drying Technology: Experience the next level of precise drying

The Premium Professional Dryers combine the energy saving efficiency of the heat pump technology with the long-lasting durability for the commercial usage.

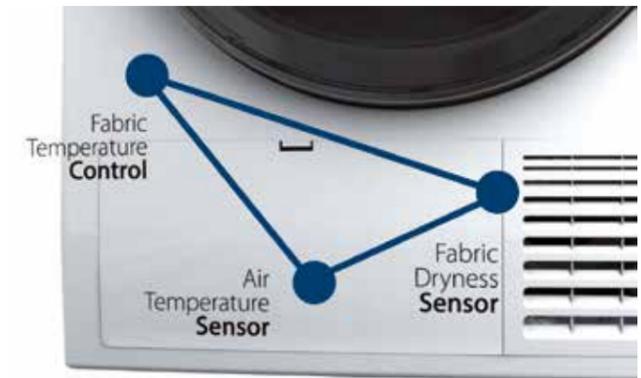

BULKY ITEMS EVENLY DRIED WITH THE 3-DIMENSIONAL DRYING TECHNOLOGY

The 3-Dimensional Drying Technology allows a **unique three dimensional air distribution**, reaching every inch of the drum. The hot air enters both from the holes in the back of the drum and the holes on the lifters, ensuring a more powerful heat distribution. From today, uniform drying of bulky items such as bed linen is guaranteed with no more wet zones.

TIME AND ENERGY EFFICIENCY THANKS TO THE SENSORS' CONTROL

Through 3 different sensors, the **sensors' control** monitors the **humidity and dryness level** of the load adapting the drying cycle automatically, guaranteeing optimal performance, with **time and energy optimization**.

A NEW DIMENSION OF FRESHNESS

Crease Care is the solution to keep the garments **fresh and soft** inside the drum **for up to 6 hours after the cycle ends**, avoiding the creation of bad smells and preventing from any folds, thanks to the ideal temperature condition kept inside of the drum for long, together with the delicate tumbling action. This technology allows consumers to unload the dryer whenever they need.

GENTLE MOVE FOR THE BEST GARMENTS CARE

The GENTLE MOVE technology allows a **better distribution of the clothes in the drum**, thanks to the bi-directional movement, improving **drying uniformity** through a better circulation of airflow and a complete evaporation of the humidity. This provides-tailored movements for any kind of fabrics.

THE BEAUTY OF THE WOOL ALWAYS PRESERVED AT BEST

A delicate drying cycle that **respects the beauty of the finest woolen garments**, maintaining them soft and smooth as new. It gently dries garments labeled “hand wash”. Thanks to the Inverter Motor, that enables the satellization phase at the end of the cycle, the clothes cling to the side of the drum, so their fibres are protected from chafing and felting. The cycle is endorsed by the Woolmark Company and gained the prestigious **Woolmark Blue certification**.

AN ECO-FRIENDLY SOLUTION THE HEAT PUMP REACHES THE ENERGY EFFICIENCY A++

Thanks to the Inverter Motor and the heat pump technology, the Professional Premium Dryers assure the **max energy efficiency without compromising the drying results**. **To dry a full load with cotton cupboard dry, you can save up to 60% kWh than a condenser standard.**

Intuitive user interface to make the use easier than ever

The Premium dryers provide an intuitive and easy-to-use interface that simplify the interaction with the machine, offering a great drying experience to everyone.

A LARGE RANGE OF CYCLES FOR ANY NEED

With its wide range of different options and drying cycles, these dryers offer the possibility to choose the best cycle for any need and treat any tissue. The improved electronic allows to manage a larger cycle choice, such as downjacket, sport cycle, coloured, silk, cotton, bulky items and the most delicate ones.

SENSOR DRYING OPTION FOR A TOTAL DELEGATION OF DRYING RESULT TO THE DRYER

You can let the dryers adjust automatically the drying time according to your desired dryness level, choosing among 4 different levels:

IRON DRY

For clothes that has to be ironed after the drying cycle, therefore still slightly humid.

CUPBOARD DRY

Dried enough to be put directly in the cupboard at the end of the drying cycle.

HANGER DRY

Used for garments that have to be hanged right after the drying cycle.

EXTRA DRY

When you desire the maximum drying level for your clothes, ready to be worn.

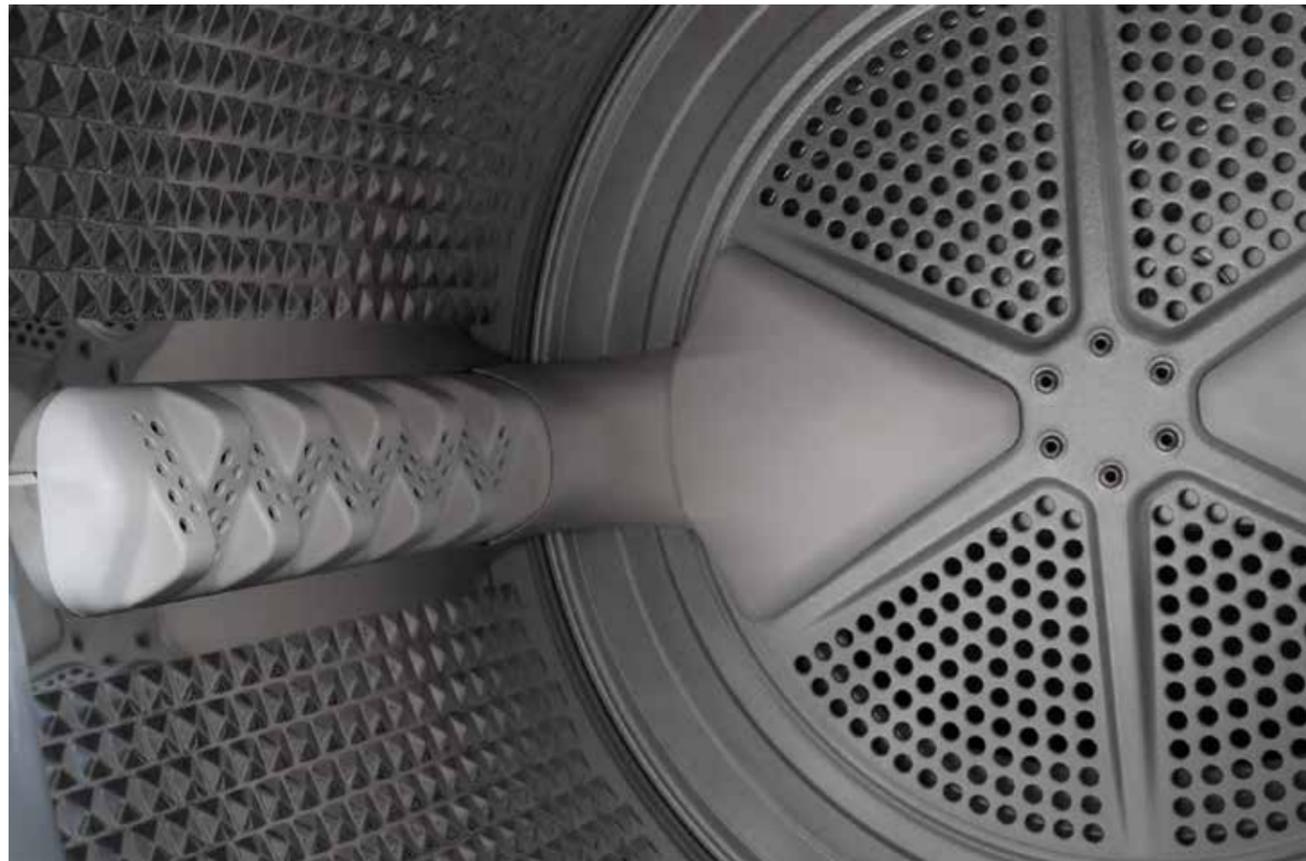

Extra long lifetime, designed and tested to last

This line has been designed and tested to guarantee **high standards of quality, robustness and reliability.**

Stronger components, more security in terms of flammability, a more performing heat pump filter and electronic are just some of the innovative and new elements that make these dryers designed to last longer than ever.

These dryers are subjected to rigorous testing like the new Dry Life Test to guarantee their durability and toughness during time. The idea is to stress all the moving mechanical components such as drum, belt, motor and seals, simulating the weight of the load with iron bars instead of wet clothes inside the drum.

The **5000 working hours reached** verify and prove the physical resistance of these components and the incredible strength of these machines

PREMIUM NOISE PACKAGE

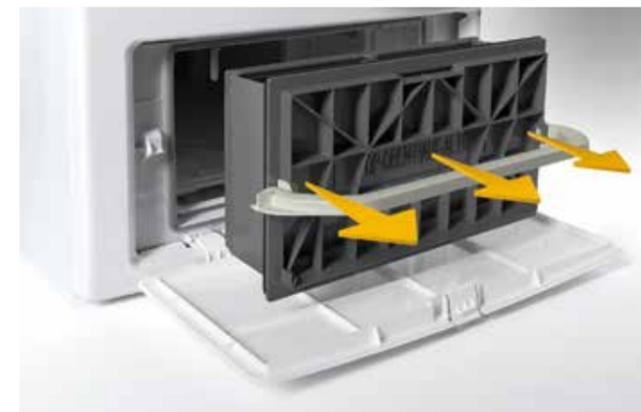

The Inverter motor combined with the insulation pack allows to experience the most **absolute silence** while the machine is running. Internal panels absorb the noise of the motor, the compressor and some other internal components, reaching just **64 dbA**.

EASY-CLEANING FILTER: CLEANING THE FILTER HAS NEVER BEEN SO EASY

A little filter collects the fluff in the condensation area, making the **cleaning operation easier than ever.**

It takes just 3 little steps: open the filter, pull the ergonomic handle to extract it and clean it. **The dryer will work for longer at its best.**

Industrial Washers and Dryers

Superior sturdiness, maximum safety and excellent performance

A large array of laundry solutions suitable for all industrial activities.

High-spin industrial washers

Reliable, flexible, designed for the highest productivity

EXCELLENT RESULTS

No Fabrics Stress

Thanks to the **inverter motor**, the drum speed can be controlled so that there is a gradual acceleration of the spin to prevent mechanical stress on the fabrics. This, together with the balanced water fill and the controlled temperature, guarantees a delicate laundry treatment, specific of any type of fabric.

No Fabrics Shocks

Thanks to the **hot and cold** usage optimisation, the washing machine loads cold and hot water alternatively, reaching the exact set temperature. By heating the water gradually, this system prevents thermal shock on the fabrics. The machine loads hot water from the mains water supply, **reducing the energy costs and cycle time.**

TOTAL SAFETY

Emergency Stop Button

The machines are equipped with an emergency stop button that switches off the machine when pressed. This button puts the washer in electric safe condition for the user whenever a possible malfunction occurs.

AUTO DOOR LOCK

The double automatic door closing system detects when the door is almost closed, locking it when the cycle starts: until this moment, the user could open the door to insert or take out linen. During the cycle, the door is locked and can be opened again only at the end of the programme when the internal temperature reaches the pre-set safety value.

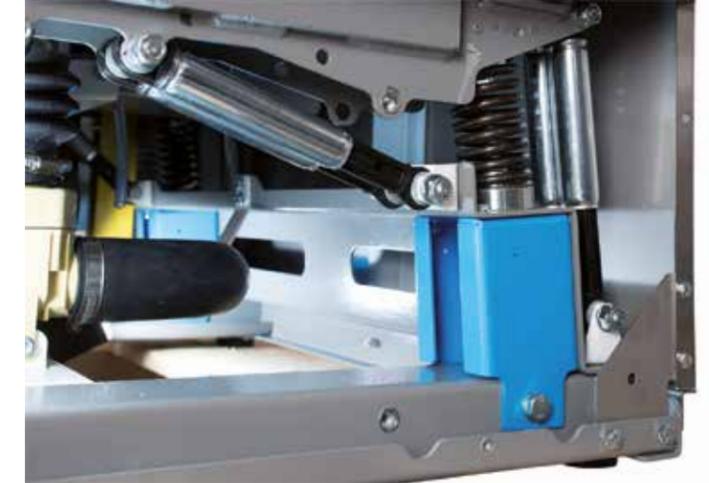

MAXIMUM STABILITY

The **Power Balance System (PBS)** is the exclusive shock-absorber system, studied to bear high stress, maintaining the washing machine stable even in the most critical situations. The washing machine can complete the wash programme also with the heaviest loads.

ERGONOMICS

The washing machine has a large loading diameter to facilitate loading and unloading operations, also with bulky linen. It is also equipped with a tilted control panel for an optimal visibility, avoiding reflections on the touch-screen display.

DURABLE DESIGN

This line boasts top quality components and materials. All panels and drums are made in stainless steel AISI 304, for a long-lasting and reliable structure.

TOTAL CONTROL OF THE WASH WITH THE INNOVATIVE TOUCH SCREEN

The innovative large touch screen control panel makes **programming, use and maintenance extremely simple and intuitive.**

The new touch control panel allows to connect the machine to the Internet through Wi-Fi and, thanks to that, the control panel is able to send to the user complex information without any space limit, like all set of economic and operating benefits. It's a **great help in the optimization of production costs.**

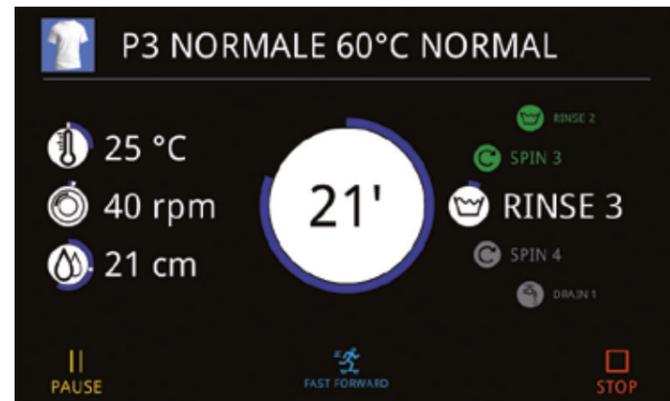

This innovative solution simplifies the business, from the cleaning management to the monitoring of the operations of the machines, up to the possibility of preventing maintenance.

The user can control at the end of the day through a Portal or a Tablet a lot of information: the energy, water and detergent used, if the washer has been stopped by the user or arrested through the emergency button or how many and which cycles have run during the day.

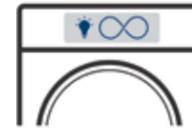

PROGRAMMING AN INDUSTRIAL WASHER HAS NEVER BEEN SO EASY

When the wished program is visualized, the display shows exactly all the parameters of washing cycle, the washing phase, the temperature used, the rpm and duration. **You can select the program and let it start with just one touch on the icon.** All parameters can be modified while the cycle is running simply touching the corresponding icon.

CUSTOMIZED CYCLES

With the **Program Function** you can modify the existing programs according to your need or create new ones, up to more than **200 new customized cycles.**

EXCELLENT CLEANING ACTION IN JUST OVER 1 HOUR

The washer has a range of **18 pre-set programs** to wash cottons, synthetics, microfiber, wool, from 30°C to 90°C. Each set cycle has a minimum of 3 rinses but it can also reach 5 in the Disinfectant program at 90°C. The user can choose according to his needs from the **quick wash** to the **Intensive** or **Disinfectant** programs that reaches 90°C with 5 rinses, ensuring a sanitizing action in **just over 1 hour.**

ALA 021 BP

SAME FOR: ALA 024 BP, ALA 025 BP,
ALA 028 BP, ALA 029 BP

MAIN FEATURES

- From 8 kg to 23 kg
- G-Factor: from 300 up to 350 (950 and 1000 rpm)
- Inverter motor
- Hot & cold water connection
- LCD display with 200 programmes
- USB connection on the rear panel
- Emergency stop and motorised door lock for total safety
- Innovative shock-absorber system – PBS – for maximum stability
- All panels and drum in stainless steel AISI 304
- No need to be anchored to the ground

ALA 031 BP

SAME FOR: ALA 032 BP, ALA 033 BP,
ALA 034 BP

MAIN FEATURES

- From 40 to 85 kg
- G-Factor: 377 (830rpm)
- Inverter motor
- Hot & cold water connection
- LCD display with 200 programmes
- USB connection on the rear panel
- Emergency stop and motorised door lock for total safety
- Innovative shock-absorber system – PBS – for maximum stability
- All panels and drum in stainless steel AISI 304
- Need to be anchored to the ground

ALA 030.2 BP

MAIN FEATURES

- 32 kg
- G-Factor: 400 (915rpm)
- Inverter motor
- Hot and cold water connection
- LCD display with 200 programmes
- USB connection on the rear panel
- Emergency stop and motorised door lock for total safety
- Innovative shock-absorber system – PBS – for maximum stability
- All panels and drum in stainless steel AISI 304
- Solid door with new design and height to facilitate loading and unloading of the linen
- No need to be anchored to the ground

The ideal solution for all industrial activities that need professional drying results and high productivity

PERFECT DRYING RESULTS

Residual Moisture Control

The humidity control programmes stop automatically when the set residual level is reached. This allows for saving time and prevent damages to fabrics due to incorrect setting by the operator.

Reversing Drum

Thanks to the reversing rotating function the drying results are uniform even with large loads.

TOTAL LINEN CARE

Multi-step Heating System

The set temperatures for the heating and cooling phases are reached through different temperature steps. This system prevents damages to fabrics due to sudden changes in temperature.

No-Wrinkle Function

At the end of the cycle, the drum keeps on rotating and reversing, to prevent wrinkles from forming wrinkles. This will also facilitate ironing.

SAFETY

A safety device stops the tumble dryer if the door is opened while the dryer is working.

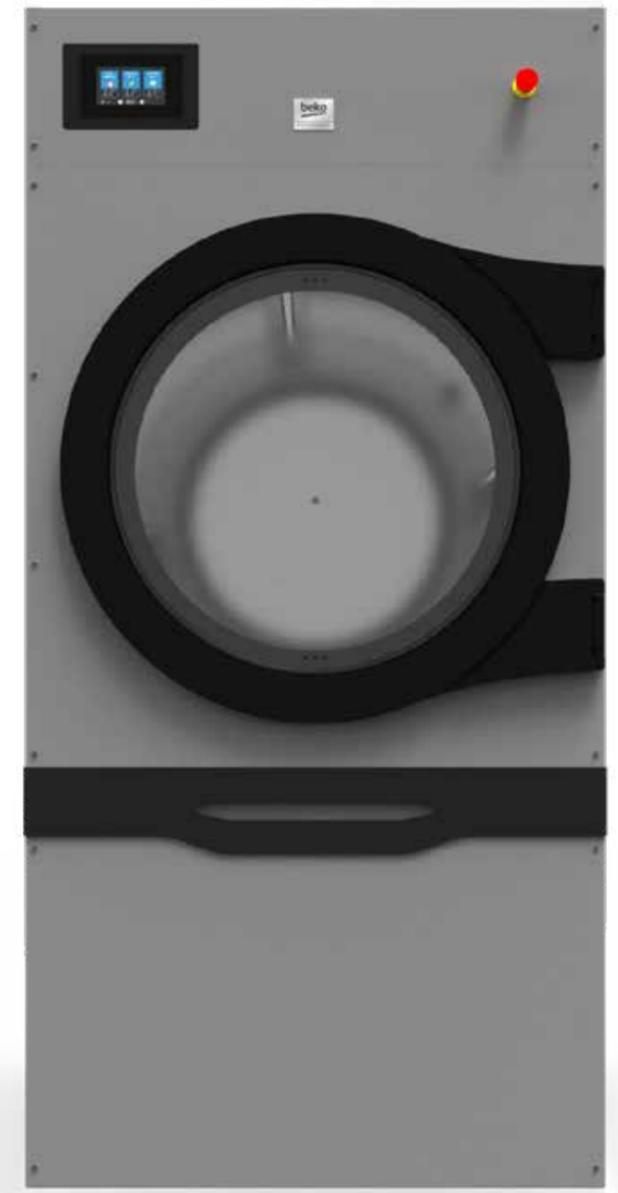

ERGONOMICS

The door width, its opening to 180° and its position make loading of the linen easier.

LOW NOISE

The dryers have been studied to maintain a noise level below 70dB (A) thanks to the drying chamber thermally and acoustically insulated with rock wool.

ALA 007 BP

SAME FOR: ALA 008 BP, ALA 009 BP,
ALA 010 BP, ALA 011 BP

MAIN FEATURES

- From 11 to 36 kg
- Residual moisture system
- Reversing drum
- Multi-step heating function for linen care
- No-wrinkle function
- LCD display with 30 programmes
- Door opening safety system
- Low noise level below 70 dB(A)
- AISI 304 Stainless Steel drum
- Heating type: Electric

ALA 015 BP

SAME FOR: ALA 016 BP, ALA 017 BP,
ALA 018 BP, ALA 019 BP

MAIN FEATURES

- From 10 kg to 34 kg
- Residual moisture system
- Reversing drum
- Multi-step heating function for linen care
- No-wrinkle function
- LCD display with 30 programmes
- Door opening safety system
- Low noise level below 70 dB(A)
- AISI 304 Stainless Steel drum
- Heating type: Gas

ALA 048 BP

MAIN FEATURES

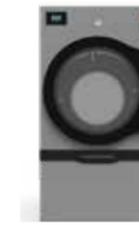

- 75 kg
- Residual moisture system
- Reversing drum
- Multi-step heating function for linen care
- No-wrinkle function
- LCD display with 30 programmes
- Door opening safety system
- Low noise level below 70 dB(A)
- AISI 304 Stainless Steel drum
- Heating type: Electric

ALA 049 BP

MAIN FEATURES

- 75 kg
- Residual moisture system
- Reversing drum
- Multi-step heating function for linen care
- No-wrinkle function
- LCD display with 30 programmes
- Door opening safety system
- Low noise level below 70 dB(A)
- AISI 304 Stainless Steel drum
- Heating type: Gas

Professional Ironing

Top quality, attention to details and advanced technology are the pillars of Beko Professional ironers

Find out which of our professional ironing solutions best suits your business.

Beko Professional flatwork ironers guarantee extraordinary **performance** and **high productivity**

EFFICIENCY FOR GREAT IRONING RESULTS

Ironing Pressure Control

The flat ironers are equipped with an advanced system capable of controlling the ironing pressure and customising the programme according to the fabric, to ensure flawless results. Moreover, the torsion bar helps to maintain the chest pressure uniform along the entire roller length for perfect ironing.

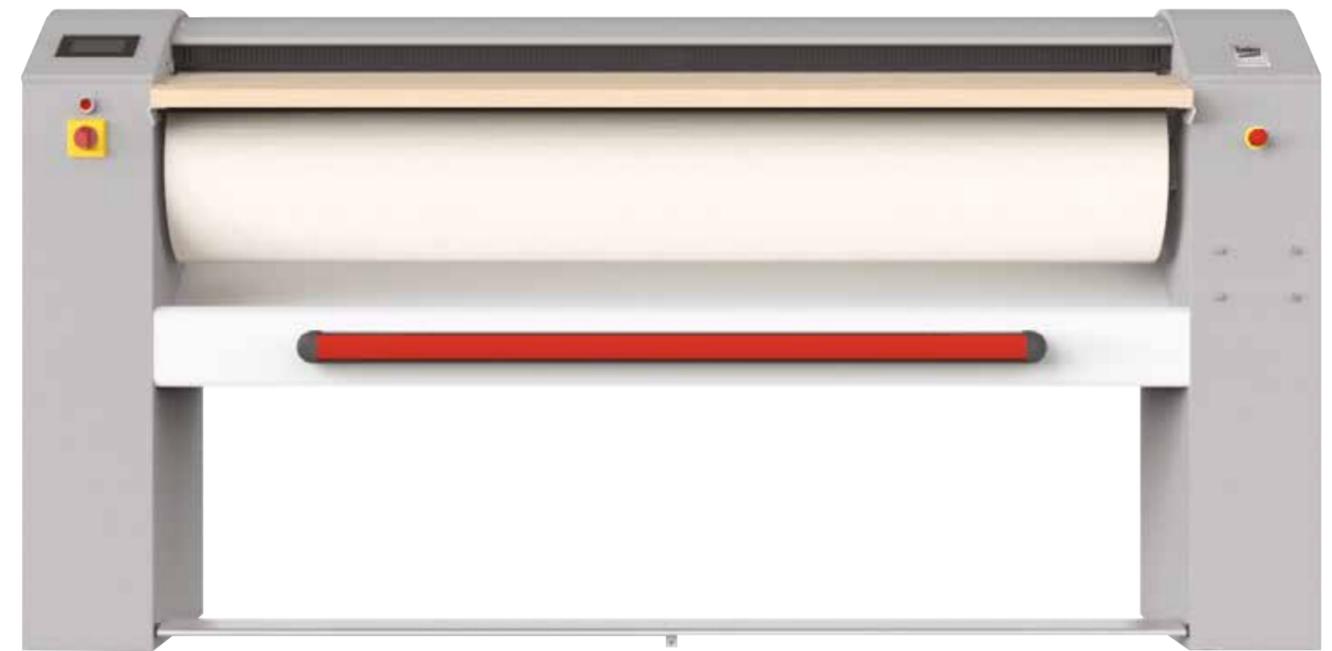

Power Control Function

Thanks to this function, the operator can choose whether to operate at low speed or at the highest level, according to the power available. It is possible to check the energy consumption on the display.

Auto-Adjustment of the speed

The flatwork ironers are also equipped with an automatic regulation device, to adjust the roller speed according to the ironing temperature. Since linen may have different levels of moisture, the speed is automatically increased or decreased according to the temperature of the roller.

SAFETY AND ERGONOMICS

Beko Professional flatwork ironers have several devices, specially designed to make laundry work easier, faster and safer.

Adjustable Table

The introduction table can be adjusted to make the user's position more comfortable.

Pedal Board

The pedal board starts and stops ironing with the simple pressing of the foot.

Hand Safety Bar

The hand safety bar prevents the accidental slipping of a limb or stretching of a textile behind the roller.

Emergency Stop Button

In case of danger, the emergency stop button cuts off the power immediately.

Anti-Panic Bar

The Anti-Panic Bar is an additional safety device for the operator. It is positioned at knee level, and instantly releases the chest when pressed.

ADVANCED TECHNOLOGY

The high-resolution touch display allows for unlimited storage of ironing programmes, which can vary according to the temperature, speed and pressure.

The programmes can be modified even during the cycle and there is also the possibility of associating icons or customised pictures for each programme.

ENERGY SAVING

From the display it's possible to activate the Cool Down Function, which can be selected when the cycle has almost terminated; the heating system stops but the flatwork ironer keeps on working with the heat energy stored. When the temperatures drops below 80°C, the flatwork ironer turns off automatically.

This function has two advantages:

- it prolongs the life of the roller cover;
- it saves energy due to use of the heat energy stored.

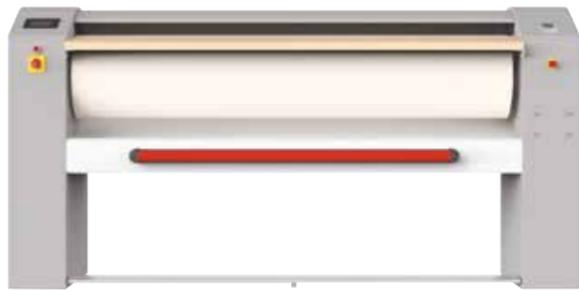

EASY SERVICING

The touch-screen control panel keeps the record of the working hours. Moreover, it is possible to read the alarm history and troubleshooting, making the job of the technician much easier.

ADN 485 BP

SAME FOR: ADN 486 BP, ADN 487 BP,
ADN 488 BP, ADN 489 BP,
ADN 490 BP, ADN 491 BP

MAIN FEATURES

- Chest pressure control, adjustable according to fabric type
- Uniform chest pressure across the length of the roller
- Possibility of setting various standard and customised programmes for different temperatures, speed, pressure and fabrics
- Auto-adjustment of the roller speed
- Adjustable table
- Pedal board
- Hand safety bar
- Emergency stop button
- Anti-Panic bar for instant chest opening
- Simple and versatile micro-processor with wide display
- Inverter motor
- Durable padding
- 3-layer rollers
- Best results with 20% residual moisture

Beko Professional ironers ensure superior efficiency against the most difficult folds

The Beko Professional range dedicated to ironing also includes products designed to cover different needs, ranging from electric steam boiler ironers to professional ironing tables, capable of satisfying the needs of sectors such as small laundries, hotels and communities.

ADN 042 BP

MAIN FEATURES

- 12NC Code 859991721860
- EAN Code 8690842995620
- Termical insulated electric steam boiler
- Die-cast aluminum boiler
- Manually-operated water feeding
- Drinking water feeding
- Automatic pressure control by thermostat with fixed setting
- Boiler capacity 1.75 lt
- Autonomy of operation 2 – 3 hours
- Power: boiler heater 1 kW, iron heater 0.83 kW
- Connection rating (Kw): 1830
- Voltage (V)/Frequency: 230V – 50Hz
- Steam pressure (bar): 2.6
- External dimensions (WxDxHmm): 230x420x300
- Packaging Dimensions (WxDxHmm): 390x480x300
- Net/Gross Weight (kg): 8/9 kg
- Schuko Plug

ADN 043 BP

MAIN FEATURES

- 12NC Code 859991722170
- EAN Code 8690842995699
- Termical insulated electric steam boiler
- Stainless steel boiler
- Manually-operated water feeding
- Drinking water feeding
- Automatic pressure control through pressure switch
- Boiler capacity 4 lt
- Autonomy of operation 5 – 6 hours
- Power: boiler heater 1.45 kW, iron heater 0.83 kW
- Connection rating (Kw): 2280
- Voltage (V)/Frequency: 230V – 50Hz
- Steam pressure (bar): 2.6
- External dimensions (WxDxHmm): 270x400x320
- Packaging Dimensions (WxDxHmm): 600x450x540
- Net/Gross Weight (kg): 11/16 kg
- Schuko Plug

ADN 040 BP

MAIN FEATURES

- 12 NC 859991722190
- EANCode 8690842995736
- Vacuum finishing table with Sleeve Shape
- Finishing table with suction and electrically heated board, controlled by a thermostat
- Built-in electric steam boiler
- Automatic water feeding
- Board heater 1kW
- Boiler heater 3.9kW
- Water inlet 3/8"
- Board dimension 1200x400x250mm
- Connection rating (Kw): 6270
- Voltage (V)/Frequency: 400V/3N – 50Hz
- Steam pressure (bar): 2.8
- Swinging arm with suction and heated sleeve shape
- Water pump
- External dimensions (WxDxHmm): 1550x580x950
- Packaging Dimensions (WxDxHmm): 1520x580x1120
- Net/Gross Weight (kg): 87/103 kg

ADN 041 BP

MAIN FEATURES

- 12NC Code 859991722210
- EAN Code 8690842995668
- Folding ironing table with electrically heated board and built-in vacuum unit
- Board heater: 700W
- Vacuum motor: 150W
- Connection rating (Kw): 700
- Voltage (V)/Frequency: 230V – 50Hz
- External dimensions (WxDxHmm): 1380x380x930
- Packaging Dimensions (WxDxHmm): 1460x460x380
- Net/Gross Weight (kg): 22/24 kg
- Schuko Plug

ADN 044 BP

MAIN FEATURES

- 12NC Code 859991722180
- EAN Code 8690842995729
- Utility vacuum table with electrically heated board
- Version with built-in electric steam boiler, water pump, water feeding tank and electric steam iron
- Built-in suction unit controlled by foot pedal
- Adjustable board temperature through thermostat
- Pedals on both sides of the table
- Board heater 0.7kW
- Boiler heater 1.45kW
- Suction motor 0.13kW
- Boiler capacity 4 l
- Board dimension 1350x380x270mm
- Connection rating (Kw): 3100
- Voltage (V)/Frequency: 230V – 50Hz
- Steam pressure (bar): 2.8
- Swinging arm with suction and heated sleeve shape
- External dimensions (WxDxHmm): 1380x380x930
- Packaging Dimensions (WxDxHmm): 1170x500x1100
- Net/Gross Weight (kg): 43/57 kg
- Schuko Plug

Professional Warewashing

Performance, reliability, hygiene and easy of use

The Beko Professional Warewashing range has been studied to satisfy the needs of all professional users and includes glass washers, dishwashers, hood dishwashers and pot machines.

A wide and complete range for warewashing equipment

The new range of Beko Professional warewashers is versatile and it offers different solutions to fully satisfy every need. The range is divided into three different product lines: HIGH Line, STANDARD Line, ECO Line.

HIGH LINE

The HIGH-Line models are designed to ensure top-quality results. They are technologically advanced thanks to special features that manage water temperatures, heat recovery and energy consumption. The display is a LCD.

STANDARD LINE

The STANDARD Line models guarantee superior performances and total reliability. They are designed to be customised to cover all needs. The display is DIGIT.

ECO LINE

The ECO-Line models are studied for heavy-duty and user-friendly use. They combine effective washing performances with low consumption. They have mechanical control with buttons.

POWERFUL WASH PROGRAMMES FOR EXCELLENT RESULTS

A varied choice of programmes suitable for every need, for optimal timing and consumption of water, detergent and energy.

Short and effective cycles that last from 60 up to 480 seconds, specially designed for all kinds of crockery (glasses, cutlery and coffee cups, dishes and beer glasses) and different dirt levels.

PROGRAMMES

	1	2	3	4	5
	GLASSES	CUTLERY & COFFEE CUPS	DISHES	HEAVY WASH	BEER GLASSES
Duration	60 sec.	120 sec.	180 sec.	480 sec.	130 sec.
Wash temp.	55°C	55°C	55°C	55°C	Extra final
Rinse temp.	65°C-70°C	70°C-75°C	75°C-80°C	80°C-85°C	COLD RINSE on Programme 2

The washing phase always works at 55°C while the rinsing temperature can rise up to 80°C to guarantee the sanitising action.

The High Line models also have a dedicated cycle for beer glasses that perform a cold water rinse in the final phase of the cycle so the glasses can be immediately used to pour beer directly after washing.

ABSOLUTE RINSING PERFORMANCE FOR SANITISING RESULTS

The rinsing process is the most important part to ensure the best washing results and total hygiene. To guarantee these results, it is fundamental that the temperature and water pressure must be kept constant throughout the whole rinsing phase.

For this reason, the Beko Professional Standard and High line ranges are equipped with the **HI-Energy** efficiency system, the advanced technology that, thanks to the atmospheric boiler combined with the break tank, allows the machine to have the water necessary for the rinse always at the right temperature and pressure.

This technology guarantees not only the sanitising action and improved removal of detergent residues but also time and energy saving.

«CRV» SYSTEM FOR ENERGY SAVING

The hood dishwasher line is also available with an innovative technology, the CRV system, that saves energy and improves the work conditions by reducing the humidity in the work environment. The «CRV» is a heat recovery system that turns the steam created during the washing phase into warm water used for the rinsing phase of the next cycle. Thanks to this device you can use an heating element of just 6kW instead of 10kW, without any compromise on the result.

Moreover, the CRV System improves the work conditions for operators because all the steam is drawn in instead of being released into the wokplace.

PURE WATER FOR OUTSTANDING WASHING RESULTS

In order to obtain excellent washing performance the water must be absolutely pure. For this reason, Beko Professional High Line dishwashers are equipped with the **Osmosis system** guaranteeing excellent cleaning results thanks to a semi-permeable membrane, which separates the organic and inorganic substances dissolved in the water. This device is able to withhold about 98% of the chemical substances in the water.

In this way, the pure water obtained guarantees optimal washing results, with no need for extra cleaning, together with lower running costs.

AUTOMATIC WATER SOFTENER

The Standard and High line machines are also available with the automatic water softener, a device that reduces the water hardness thanks to special resins that convert ions of calcium, iron and magnesium into ions of sodium, while helping to prevent possible damages due to calcareous deposits.

TOP QUALITY, STURDINESS AND RELIABILITY

The whole range has been designed to guarantee high standards of quality, robustness and reliability.

- **AISI 304 Stainless Steel** - All products are made in Italy and built in stainless steel
- **Insulated Double-Skin Cabinet & Double-Wall Door** - The structure with double wall on the door and the insulated double-skin cabinet ensure a lower noise level and reduce the heat emission 
- **Double Filter** - The double filter in the washing tank guarantees the best hygiene and total protection of the washing pump 
- **Easy Maintenance** - The stainless steel structure and the rounded corners make cleaning operations much easier and improve the hygiene
- **GS-TUV Certification** - All products boast the GS-TUV Certification that guarantees lasting mechanical and electrical safety 

INTUITIVE USER INTERFACES FOR EASE OF USE

Choosing the right programme has never been so easy. The product lines have 3 different control panels with easy interaction and programming: LCD, Digital and Mechanical user interface.

LCD - HIGH LINE

DIGITAL - STANDARD LINE

MECHANICAL - ECO LINE

PREMIUM LCD USER INTERFACE

The cutting-edge electronic control panel with large TFT colour screen is the largest on the market. It measures measuring 45x60mm and has high-resolution animation graphics.

It ensures straightforward and intuitive use of the dishwashers, providing information such as temperature, working phases, time to end, machine status, potential anomalies.

BASKET SIZES

Each type of product line differs according to the size and the height of the basket. The 50x50cm basket can contain up to 18 dishes.

	GLASS WASHER		DISHWASHER		HOOD DW WASHER		POT WASHER	
SEGMENTATION	BASKET SIZE	HEIGHT	BASKET SIZE	HEIGHT	BASKET SIZE	HEIGHT	BASKET SIZE	HEIGHT
ECO LINE	35x35cm 40x40cm	22cm 32cm (no upper washing arm)	50x50cm	33cm	50x50cm	43cm		
STANDARD LINE	40x40cm	27.5cm	50x50cm	34cm	50x50cm	43cm		
HIGH LINE	40x40cm	27.5cm	50x50cm	40cm	50x50cm	43cm	57x62cm 66.5x66.5cm 61.5x115cm	62cm 86cm 86cm

BASKET EQUIPMENT

The ware washers come with one or more baskets for cleaning glasses or dishes. Together with the glass basket there is also a teaspoon holder, while the dish basket has the cutlery holder inside.

	GLASS WASHER	DISHWASHER	HOOD DW WASHER	POT WASHER
ECO LINE	1 glass basket 1 spoon holder	1 glass basket 1 dish basket 1 cutlery holder	1 glass basket 1 dish basket 2 cutlery holders	
STANDARD LINE	1 glass basket 1 dish basket 1 spoon holder	1 glass basket 2 dish baskets 1 cutlery holder	1 glass basket 2 dish baskets 2 cutlery holders	
HIGH LINE	2 glass baskets 1 spoon holder	1 glass basket 2 dish baskets 1 cutlery holder	1 glass basket 2 dish baskets 2 cutlery holders	1 universal stainless-inox rack (Models HPL734/HPL834) 1 stainless-inox baking tray rack (Models HPL734/HPL834) 1x24 plates, 1 universal basket, 1 baking-tray rack, 2 cutlery holder (Model HPL634)

Also included

HGL 44 SA BP

SAME FOR: HGL 44 A BP

MAIN FEATURES

- LCD display
- Double-panel wash tank
- Built-in rinse-aid dosing
- Detergent dosing
- HI-Energy efficiency system
- Drain pump
- Stainless steel rinsing arm
- Upper washing arm
- Automatic drain
- Automatic softener (HGL 44 SA BP only)

EGM 4 BP

SAME FOR: EGM 3 BP

MAIN FEATURES

- Mechanical control
- Single-panel wash tank
- Built-in rinse-aid dosing
- Standard overflow pipe

SGD 44 S BP

SAME FOR: SGD 44 BP

MAIN FEATURES

- Digital user Interface
- Double-panel wash tank
- Built-in rinse-aid dosing
- Detergent dosing
- HI-Energy efficiency system
- Drain pump
- Stainless steel rinsing arm
- Upper washing arm
- Automatic softener (SGD 44 S BP only)

HDL 534 SAO BP

SAME FOR: HDL 534 SA BP, HDL 534 A BP

MAIN FEATURES

- LCD display
- Double-panel wash tank
- Built-in rinse-aid dosing
- Detergent dosing
- HI-Energy efficiency system
- Drain pump
- Stainless steel rinsing arm
- Upper washing arm
- Automatic drain
- Automatic softener (except for HDL 534 A BP)
- Integrated osmosis system (HDL 534 SAO BP only)

EDM 53 DU BP

SAME FOR: EDM 5 DU BP, EDM 5 U BP

MAIN FEATURES

- Mechanical control
- Single-panel wash tank
- Built-in rinse-aid dosing
- Upper washing arm
- Drain pump (except for EDM 5 U BP)

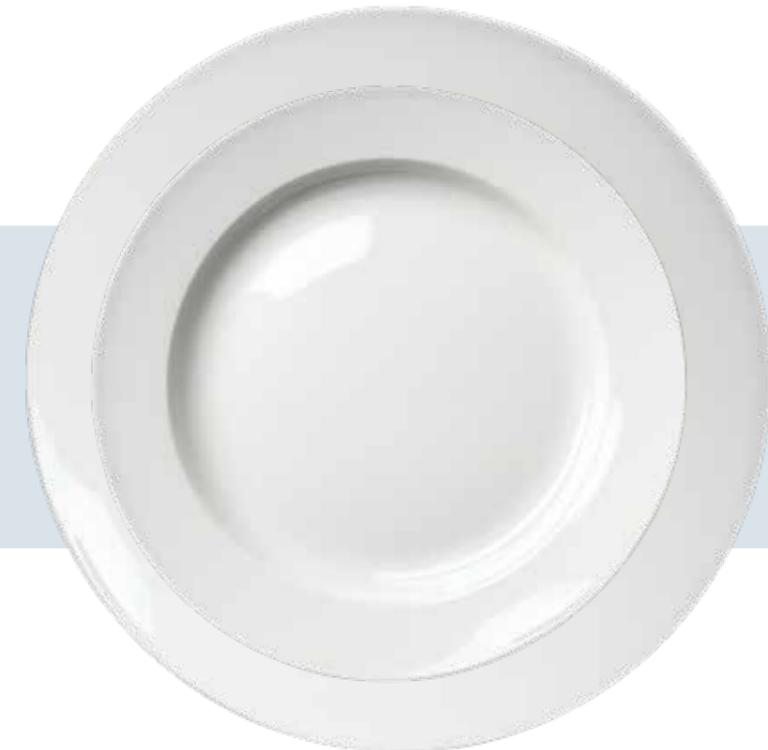

SDD 534 US BP

SAME FOR: SDD 54 US BP, SDD 534 U BP,

Professional Refrigeration

The best cooling equipment to preserve the quality and freshness of your food

The Beko Professional Cooling equipment boasts a wide range of long-lasting and robust products, capable of satisfying any storage capacity.

Display Coolers

Ideal for bars, pubs and restaurants

FLEXIBILITY

This line of refrigerators is designed for storing and displaying food or beverages and features various capacities: from **130 litres up to 480 litres**.

EASY TO USE AND TO INSTALL

All the coolers are equipped with an **easy-to-set control panel** and **adjustable shelves**, which can be inclined. They also have adjustable front feet for correct installation.

ERGONOMICS AND USABILITY

Robust handle and **door with lock** to adapt these products to all space requirements. The interior chamber is smooth and it does not collect dirt, making it **easy to clean**. The door gasket can be easily replaced for cleaning to ensure optimal hygiene. The internal LED lightening and the reversible door increase the easy usability of the products

OPTIMAL PRESERVATION

Thanks to the **double-panel glass door** and the **automatic defrost system**, this range of display coolers guarantees optimal temperature uniformity and preservation performance.

PROMOTIONAL SHIELD WITH INNER LIGHTING

Some cooler models can be fitted with **customised branding in the illuminated canopy and lateral panels** for eye-catching promotion of the products inside.

PROTECTION FILM ON GLASS DOOR

It is also possible to protect from ultraviolet rays the quality of the drinks or food contained in our glass door refrigerators, thanks to a protection film that can be applied on the glass, without necessarily changing the fridge door. This protection film can be ordered as an accessory and it's available in different sizes depending on the dimensions of the door.

ACCESSORIES AVAILABLE			
Product Description	ADI 100 - Protection Film	ADI 101 - Protection Film	ADI 102 - Protection Film
12NC Code	859991627200	859991627220	859991627230
EAN Code	8003437620515	8003437620522	8003437620546
Suitable for:	ADN 200/1 BP; ADN 200/2 BP; ADN 202/1 BP; ADN 202/2 BP	ADN 201/1 BP; ADN 201/2 BP; ADN 203/1 BP; ADN 203/2 BP	ADN 221 C BP; ADN 221 BP; ADN 221/2 BP

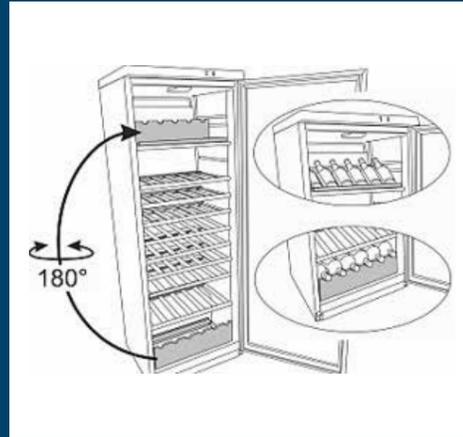

Wine Cellar

Design and quality to store wine under ideal conditions

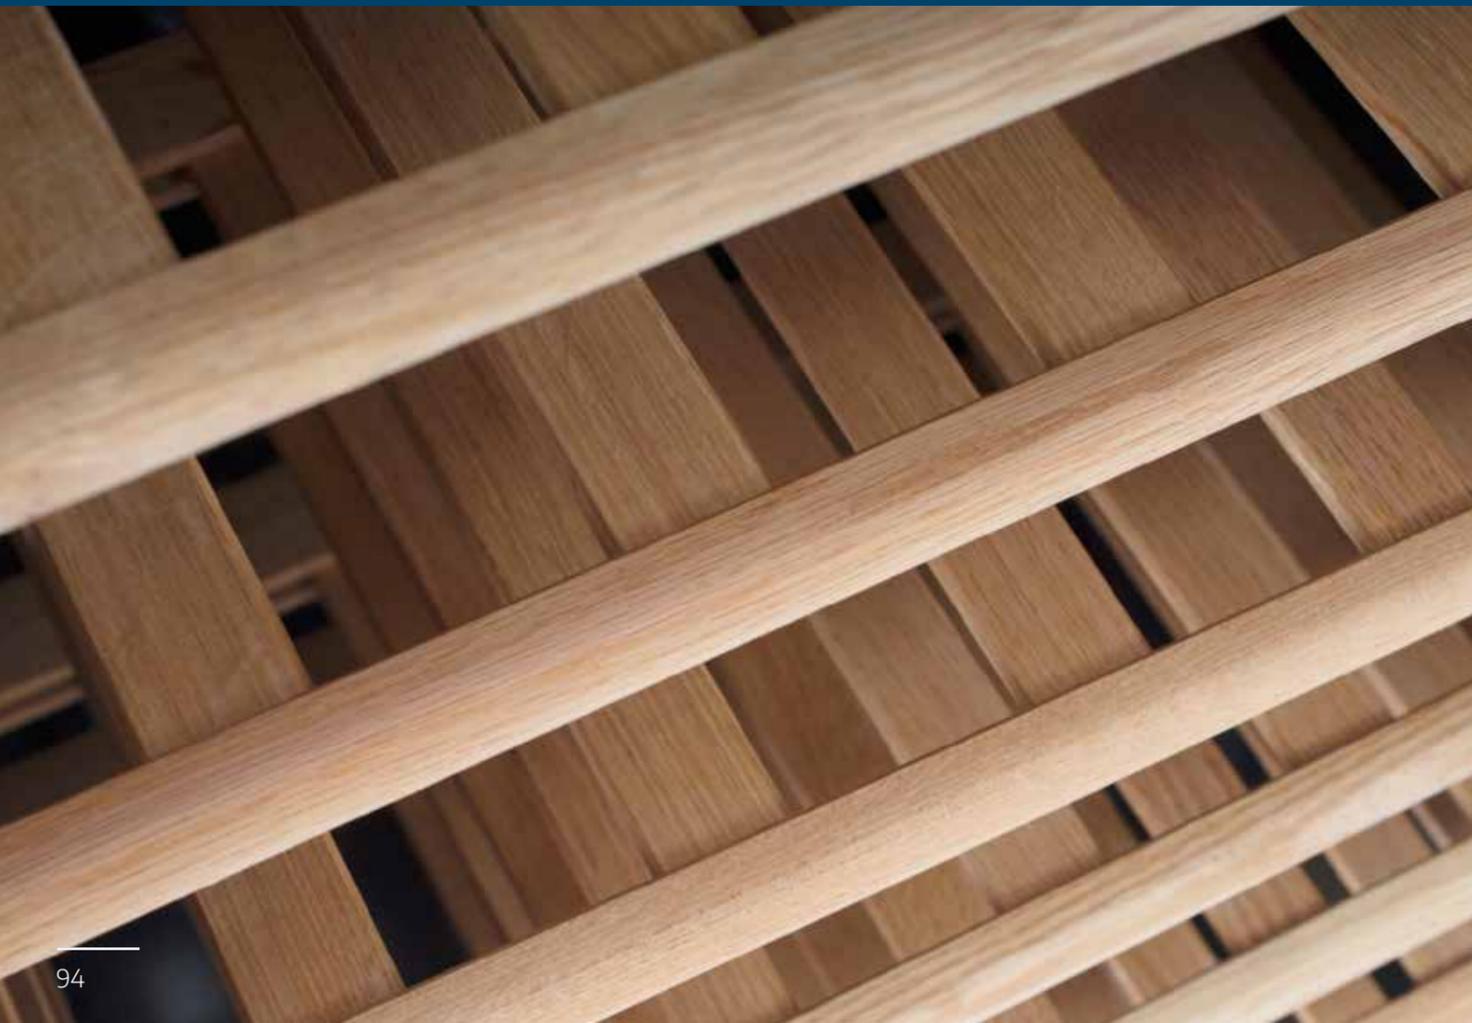

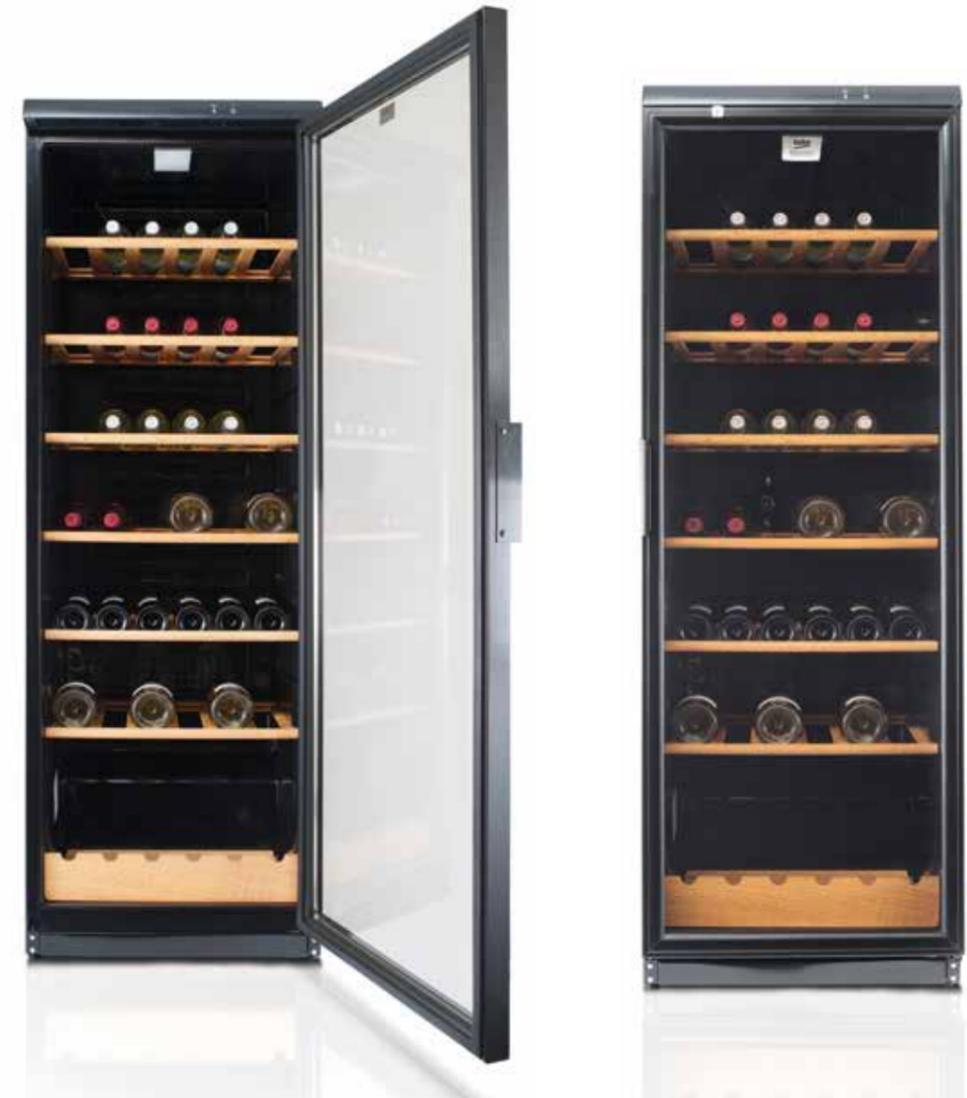

HIGH-QUALITY COMPONENTS

The shelves for wine are made of **natural oak**. The glass door has a **tinted film** to block ultraviolet rays, which adversely affect the wine quality. A **carbon filter** inside the chamber guarantees an adequate level of indoor humidity, while absorbing odours from the refrigerated cellar. Equipped with 9 adjustable wooden shelves and one adjustable wooden bottom with the possibility to tilt for displaying wine bottles. The wine cellar can hold up to 105 bottles of 0,75 L. Each shelf can support a maximum of 50 kilos.

ALWAYS AT THE IDEAL TEMPERATURE

To make sure that each bottle is served at its ideal temperature, the interior of the cellar is divided into **6 different zones, with differentiated climate fields.**

Storage Refrigerators

Innovative, spacious and with a modern design, the new Storage Refrigerators, equipped with the Automatic Defrost System, offer different capacities, **from 320L up to 480L**, with a **temperature range from - 2°C up to +8°C**, becoming quickly and easily a fundamental part for the kitchen of bars or restaurants.

This new cooling range will be **entirely in silver color, outside and inside**, and also equipped **with an internal light and an electro-mechanical thermostat**, representing at best the professional business and satisfying our any customer's needs.

The **reversible door** and the **adjustable front feet** allow you to move and adapt the refrigerator as you prefer to every different environment, making it easy and pleasant to use.

ADN 221 BP

- Analogue thermometer (ADN 221 C BP, ADN 221 BP, ADN 221/2 BP, ADN 203/1 BP, ADN 203/2 BP, ADN 230/1 BP, ADN 230/2 BP, ADN 202/1 BP, ADN 202/2 BP)

ADN 221S BP

SAME FOR: ADN 201/1S BP, ADN 203/1S BP, ADN 203B BP

MAIN FEATURES

- Mechanical control
- Automatic defrosting
- Ventilated
- Automatic water evaporation system
- Max ambient temperature 32°C
- LED internal light
- R600a gas type
- Double-panel glass Door
- Robust handle
- Reversible door (except for ADN 203/1S BP)
- Door lock
- Adjustable shelves
- Adjustable feet
- Analogue thermometer (except for ADN 201/1S BP)

ADN 231 BK BP

MAIN FEATURES

- Mechanical control
- Automatic defrosting
- Ventilated
- Automatic water evaporation system
- Max ambient temperature 32°C
- LED internal light
- R600a gas type
- Double-panel glass Door
- Tinted film on door to block ultraviolet rays
- Carbon filter to absorb alien smells
- 6 zones with differentiated temperatures
- Door lock
- Adjustable shelves
- Adjustable feet
- Bottle capacity: 105 / 0.75l

ADN 270SE BP

SAME FOR: ADN 350S BP, ADN 480S BP, ADN 248FS BP

MAIN FEATURES

- Painted dark grey internally and externally
- Automatic defrosting
- Ventilated
- Automatic water evaporation system
- Max ambient temperature 30°C (43°C for ADN 270)
- LED internal light
- Electro-mechanical thermostat
- R600a gas type
- Robust handle
- Reversible door
- Adjustable feet
- Adjustable shelves

Professional Upright Cabinets

The Beko Professional range of upright cabinets is the perfect combination of functionality and performance which can be adapted to a wide variety of needs.

BUILT TO LAST

All the models are made of **AISI 304 stainless steel both externally and internally**. All grids are plastic-coated with stainless steel and slot into stainless steel guides for safe in-and-out sliding, without the risk of tilting. The guides are fixed to robust supports, providing 23 different positions. A 60mm insulation thickness performance.

PERFORMANCE AND HIGH CAPACITY

The range includes **700l and 1400l models, both refrigerators, freezers and combi versions, with either solid or glass doors** (available on refrigerator models only). The working temperature for refrigerator models with solid doors ranges from -2°C to +8°C, while for the glass doors models it goes from +1°C up to +10°C. For the freezers the working temperature goes from -20°C to -18°C. **All models with solid doors are tropicalised T1**, thus ensuring that the products can work properly at **ambient temperatures of up to 43°C**.

TECHNOLOGY

The range of professional upright cabinets comes with **digital display controls**. All models feature a ventilated operating mode and an **automatic defrost system**.

ADN 215 BP

SAME FOR: ADN 213 BP, ADN 214 BP, ADN 216 BP, ADN 218 BP, ADN 219 BP

MAIN FEATURES

- AISI 304 Stainless Steel both internally and externally
- Electronic control
- Digital display
- Automatic defrosting
- Ventilated
- Automatic water evaporation system
- R290 gas type
- Products with solid door are tropicalised (43°C max ambient temperature)
- Products with glass door 25°C max ambient temperature
- Reversible door
- Adjustable plastic feet
- Door lock
- Internal light (ADN 215)
- Evaporator inside the cell
- Stainless Steel grid supports
- Plastic-coated grids GN 2/1

Ice Makers

Clean design, heavy-duty construction and a large array of production capacities (from 25kg to 180kg) make this line suitable for any type of use.

A COMPLETE RANGE

The range includes a vast choice of products available with an efficient air cooling system. All the ice maker models are made of AISI 304 stainless steel. They are a great choice for busy pubs and clubs where ice is a constant requirement and space is at premium.

Beko Professional offers 3 ice-maker ranges:

- full range of **Ice “cube” makers** with spray technology
- full range of **Ice “finger” makers** with paddle technology, producing clear hollow finger ice cubes
- range of **Ice “flake” makers**, producing clean, crisp, granular ice with a vertical cylindrical evaporator and a heavy-duty rotating auger mechanism.

ECO-FRIENDLY, COMPACT, EFFICIENT AND WITH SOLID STRUCTURE

The **AND 108 BP** and **ADN 112 BP** ice makers are able to create **25** and **47kg of ice in 24 h** and with a large storage capacity.

Robust ice makers with **AISI 304 stainless steel body**, they are **tropicalized machines** and have a solid structure supported by 4 steel columns and a strong door with an ergonomic opening system.

Energy consumption is reduced thanks to the **natural gas R290** with very low global warming impact.

With the **compact dimension**, ideal for business with space limitations, and the **smart front ventilation system** that allows a built-in installation of the unit, they also have **easy access for service**; all panels can be disassembled separately.

They benefit from a **patented anti-scale spray system** with small vibration to avoid limescale deposit while the **electronics control** enhances the performance of the machines allowing them to **work perfectly even in extreme climate conditions**.

ADN 108 BP ADN 112 BP

MAIN FEATURES

- Cube ice makers with gourmet ice shape, the most used in the catering
- Natural gas R290 which reduced the energy consumption and respect the environment
- AISI 304 Stainless steel body with solid structure supported by 4 steel columns
- Tropicalized machine (T Class)
- Compact dimension, ideal for business with space limitation
- Patented anti-scale spray system with small vibration to avoid limescale deposit
- Door made in stainless steel AISI 304, strong door opening system
- Electronics control that enhances the performance of the machine and allows it to adapt to extreme climates
- Smart front ventilation system that allow built-in installation of the unit
- Easy access for service and installation. All panels can be disassembled separately

Chest Freezer

This white chest freezer offers an exceptional **large capacity of 432L**, giving you all the space you need to store food and drinks. It also has a **counter-balanced lid system** so it closes gently, it's easy to access and it won't swing closed unexpectedly.

The **interior light** and the **lock protection** make this chest freezer always easy and safe to use.

Thanks to the **Fast Freezing Technology**, that sets the freezer temperature to 10 degrees colder than the lowest setting, your food will be frozen faster than ever, safeguarding its flavor, texture and nutritional values.

This solution incorporates a **water drainage system** that makes the defrost and the cleaning processes easier than ever.

Also, our chest freezer includes **three convenient baskets** to help you tidily store your packages, boxes and bags of frozen food.

THE IDEAL PRODUCT FOR B&B, HOTELS, FARMS HOUSES, SHOPS AND OFFICES

This product is compliant for the following professional business:

- staff kitchen areas in shops, offices and other working environments;
- farm houses and hotels, motels and other residential type environments;
- bed and breakfast;
- catering.

Shock freezer, the ideal product for long term preservation

The ideal solution to maintain the same taste, quality and consistency of the freshly cooked food and also maximise the workflow in the kitchen, helping saving time and money.

Blast chilling is a technology that, thanks to the conservative properties of the cold, keeps food unaltered without changing its quality, so it's also the best ally for the health food.

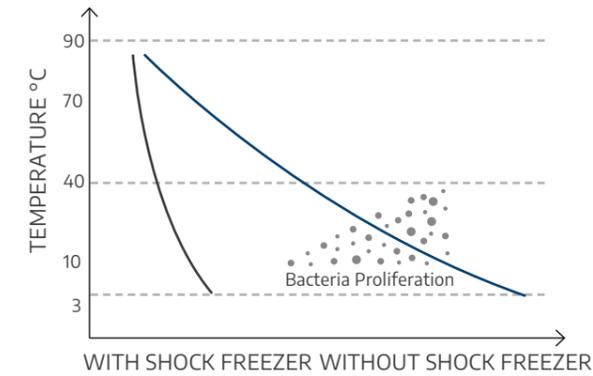

The shock freezer is a product used for RAPID Cooling. When the cooling process is fast like in this case, it generates microcrystal of ice that do not damage the structural characteristics of the food. This translates in absolute quality, consistency, taste and colour of the food that's unchanged.

PROFESSIONAL PERFORMANCE

To guarantee the best hygienic conditions of the food, by HACCP regulation the temperature of cooked food must be quickly kept to these value measured at the heart of the food:

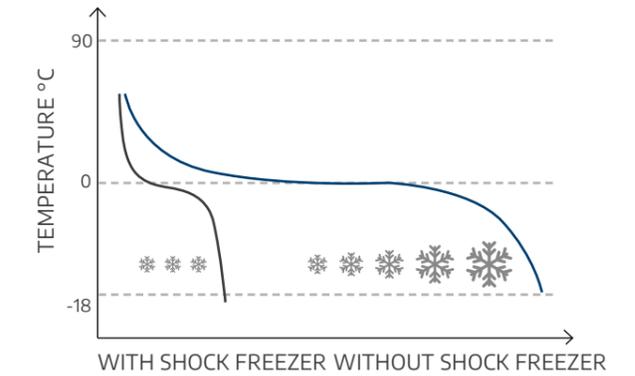

POSITIVE BLAST CHILLING

From +70°C to +3°C within 90 minutes

NEGATIVE BLAST CHILLING

From +70°C to -18°C within 240 minutes

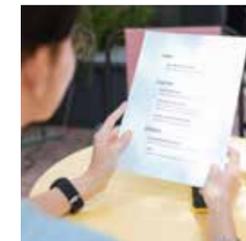

GREAT QUALITY RESULTS & GUARANTEED HYGIENE

The Blast Chiller plays an important role in the food preservation and improve the working processes.

QUALITY OF FOOD

Same quality and taste of fresh or just cooked food

ORGANISATIONAL

Better Timing organization and working plan in the kitchen, menu extension, better staff management

HYGIENE

In compliance with hygiene and healthy standard HACCP, the rapid cooling of the shock freezer avoids the bacteria proliferation

ECONOMIC

Waste reduction and less weight loss of food

THE INDISPENSABLE TOOL FOR...

RESTAURANTS

Essential tool for chefs, as it gives the opportunity to organize and plan their activity in advance, offering wide menu, a fast and efficient service with the total respect for the fragrance and freshness of food.

The biggest advantage, beyond the increase in food safety (HACCP), is the reorganization of the kitchen, thanks to the elimination of peaks of work and the daily repetitions.

BAKERIES

Cold technology has been developed in recent years also in bread-making to help reducing night working shift, workforce and overtime, offering a wide variety of products.

PÂTISSERIE

The modern pastry shop can not do without exploiting the blast chilling technology.

This help them to improve efficiency by reducing the preparation time, storage space and product and quality safety.

ICE CREAM

The creamy of the ice cream depends mainly on the presence of micro air bubbles and micro crystals of ice. To maintain its characteristics the ice cream must be put in the blast chiller.

In addition to the formation of micro ice crystals, it allows to create a thin surface barrier that prevents the product from flattening.

The result is a creamy and soft ice cream, ready to be served.

ACO D210 BP

SAME FOR: ACO D205 BP, ACO D103 BP

MAIN FEATURES

- Stainless Steel AISI 304
- 10 Trays GN1/1, but available also in 5 and 3 Trays
- Double insertion for trays GN1/1 and 60x40cm, except the 3 Trays
- Electronic Control with Digit Display
- Insulation 60 mm. in expanded polyurethane and CFC and HCFC free
- Core probe
- Door micro switch to stop fan when opening
- Air condensation
- Defrost Cycle
- Automatic cold holding at the end of the cycle

Professional Cooking

Discover our efficient catering solutions suitable for every need

Beko Professional cooking equipment features top-quality appliances and offers the widest variety for all uses in the catering industry.

Ovens Line

Experience the Professional Ovens Collection

Technology, quality and versatility make Beko Professional ovens the ideal choice to satisfy the needs of any chef.

High professionalism for top-quality results, every time

Thanks to their advanced technology and the large dimensions of the chamber, which ensures optimal circulation of the air, our professional ovens are able to enhance the flavours of each dish and to ensure uniform cooking on all trays, regardless of the load.

Our Professional Oven range is articulated with 3 different user interfaces: **Touch, Digital and Mechanical**, and with different sizes, 4, 6 and 11 levels for the Electric version and 7 levels for the gas version.

The Premium structure, thanks to its AISI 304 Stainless Steel, boasts an excellent robustness. It comes with **20 cooking phases** and the customization possibility up to **1000 different recipes**.

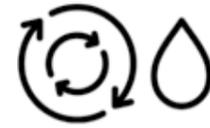

EXCELLENT PERFORMANCE WITH FOUR COOKING METHODS

The choice of four different cooking methods guarantees optimal cooking results, from delicatessen products to pastries: first courses, meat and fish dishes, vegetables, croissants, cakes, bread, pizza.

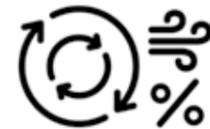

CONVECTION + VENTILATION

A fan circulates the heated air and keep the temperature steady.

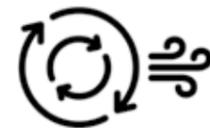

CONVECTION + HUMIDIFIER

Thanks to the humidifier system, the water is injected into the fan of the cooking chamber by pressing a button and due to the high cooking temperature, it evaporates instantly creating humidity.

CONVECTION + STEAM

The users can select the required humidity by turning the steam knob. The machine automatically introduce humidity into the cooking chamber according to the percentage selected.

CONVECTION + COMBI + STEAM 100%

With a premium oven you have the possibility to cook with three different cooking methods: just convection, combination and direct steam 100%.

3 KNOBS (TIMER & TEMPERATURE + GRILL)

2 KNOBS + HUMIDIFIER BUTTON

3 KNOBS (TIMER, TEMP, STEAM)

3 BUTTONS (TIMER, TEMP, STEAM)

The **Convection Ovens** and **Convection + Humidifier Ovens** are suitable for bar or small restaurants where I need to heat, defrost and cook pizza or brioches, where steam is not necessary.

The **Convection Ovens + Steam** are the ideal solution for foods that need to be cooked quickly at high temperature, in a humid atmosphere. Food remains tender and doesn't lose weight.

The **Combi + Direct Steam** solution instead allows to cook also with just Steam 100%, perfect for fish, vegetables or any kind of food that requires a gentle cooking, where vitamin and mineral loss is virtually null.

PERFECT COOKING RESULTS. NO MATTER WHAT YOU COOK

Beko Professional ovens are the ideal solution for both pastry and gastro cooking. Their exclusive chamber is specially designed with a double insertion, to hold both pastry trays measuring 400x600mm and GN 1/1 grids.

PASTRY OVENS

TRAYS - STANDARD SIZES:

400 x 600 mm

GASTRO OVENS

GRIDS - STANDARD SIZES:

GN 2/1 : 650 x 530 mm
GN 1/1 : 325 x 530 mm
GN 2/3 : 325 x 354 mm
 GN 2/4 : 162 x 530 mm
 GN 2/8 : 325 x 132 mm
 GN 1/2 : 325 x 265 mm
 GN 1/3 : 325 x 176 mm
 Etc.

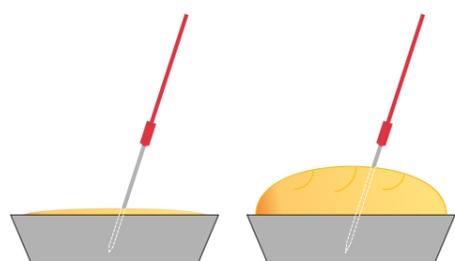

PREMIUM OVENS WITH TOUCH AND DIGIT CONTROLS

The Premium Ovens are a range of ovens with 5, 7 and 11 levels, with **Combi cooking technology + Direct Steam injection**, to satisfy any professional needs. The Touch version is also supplied with the **Multi-Cooking function**, allowing to cook different recipes and dishes in the same time, without affecting taste or smell, to optimize the time in the kitchen. This function allows the Chefs to cook and prepare their own specific menu at the same time using the same oven, without interfering with each other.

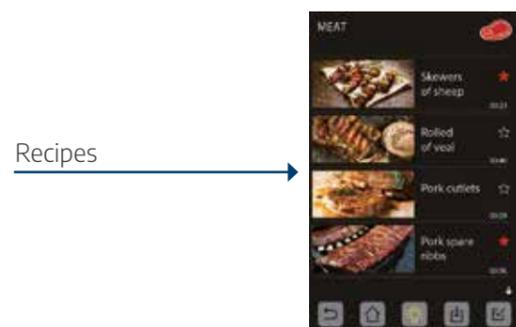

If in the **Digital version** is possible to store up to **99 programs**, in the **Touch version** I can save up to **1.000 recipes** with **20 different cooking stages**, with excellent cooking results.

The Touch Ovens are equipped with **Delta T° cooking** function with **Core probe** that keeps the temperature difference constant between the external cooking environment and the core of the product, until the heart of the food reaches the desired temperature.

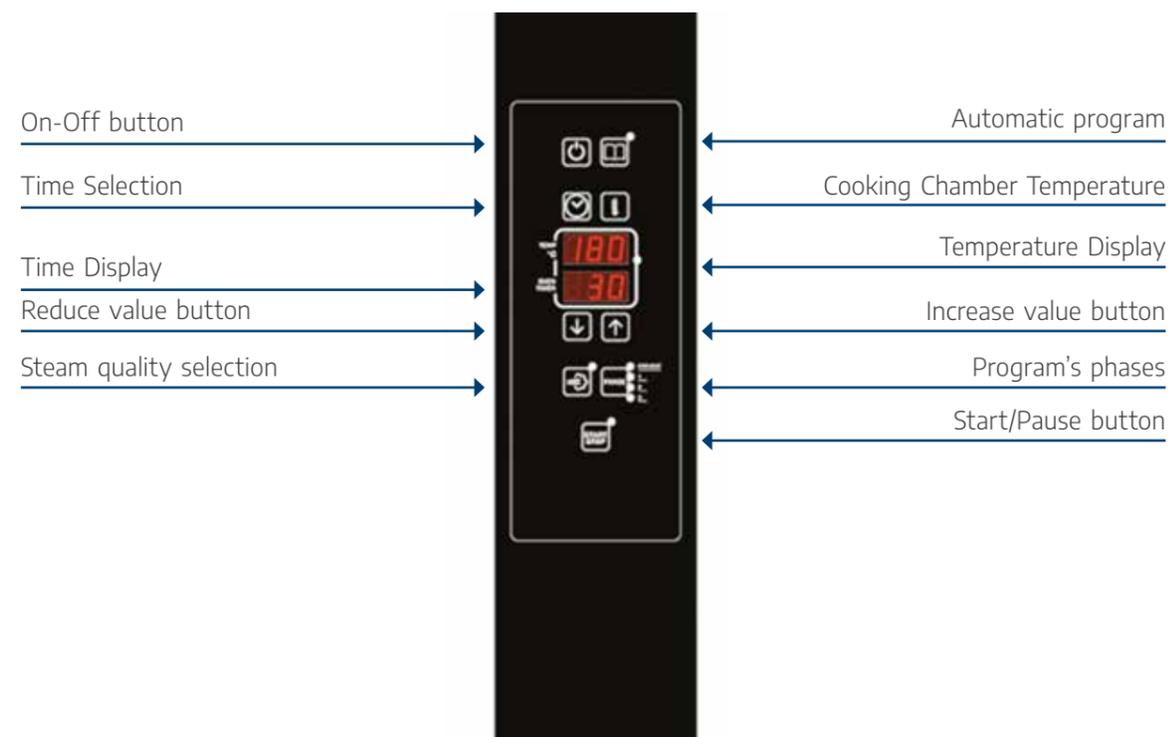

DISPLAY TOUCH CONTROL OVENS

ADVANCED TECHNOLOGY FOR TOUCH SCREEN

The **touch-screen display** ensures enhanced control with easier, faster, more precise and intuitive programming. The **USB key** allows the interaction with the oven, uploading and downloading updates and recipes, the HACCP control that allows to check how the oven has worked and much more.

DISPLAY DIGITAL OVENS

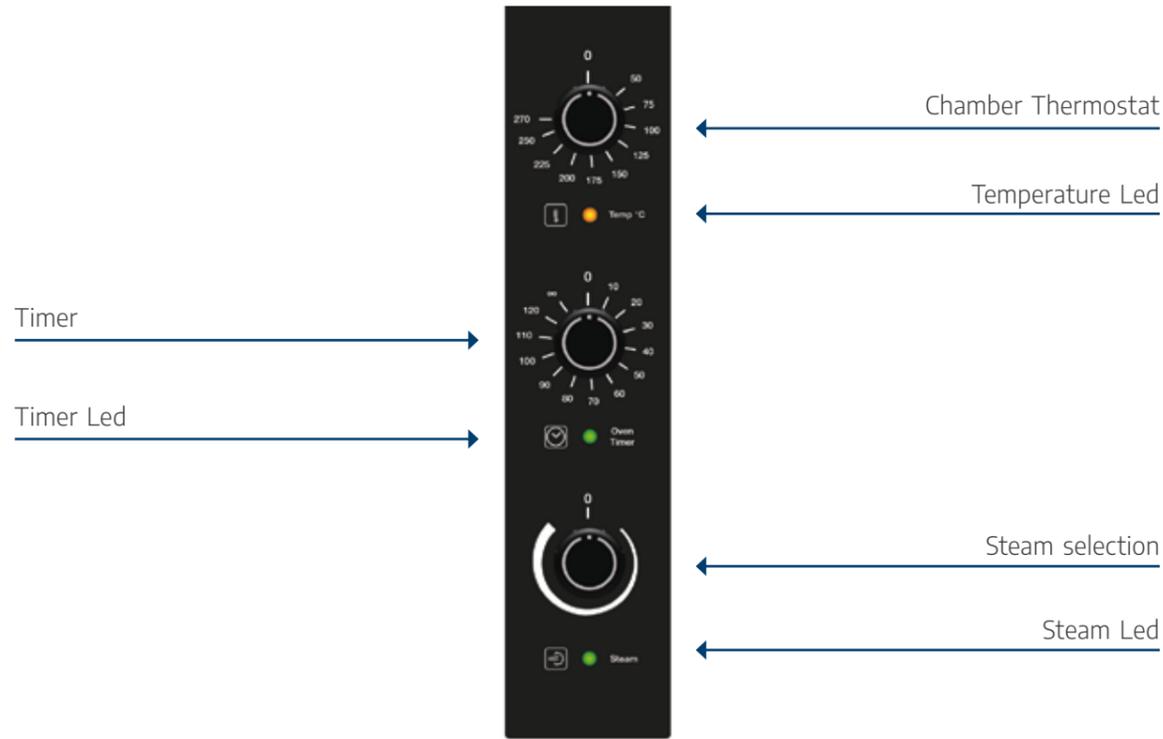

EASY VALUE OVENS

The Ovens of the Easy Value Line are also available in 4, 6 and 10 levels, with Electric power supply and **Mechanical control panel with knobs**.

Equipped with a **Convection cooking system + Steam**, they are the answer for Chefs who want quality performance at the right price.

DISPLAY EASY VALUE - MECHANICAL CONTROL

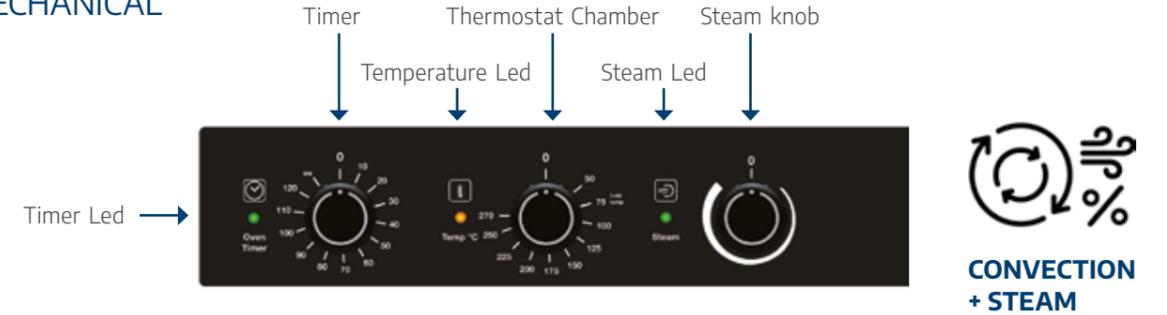

SUPPORT OVENS AND FAST VALUE OVENS

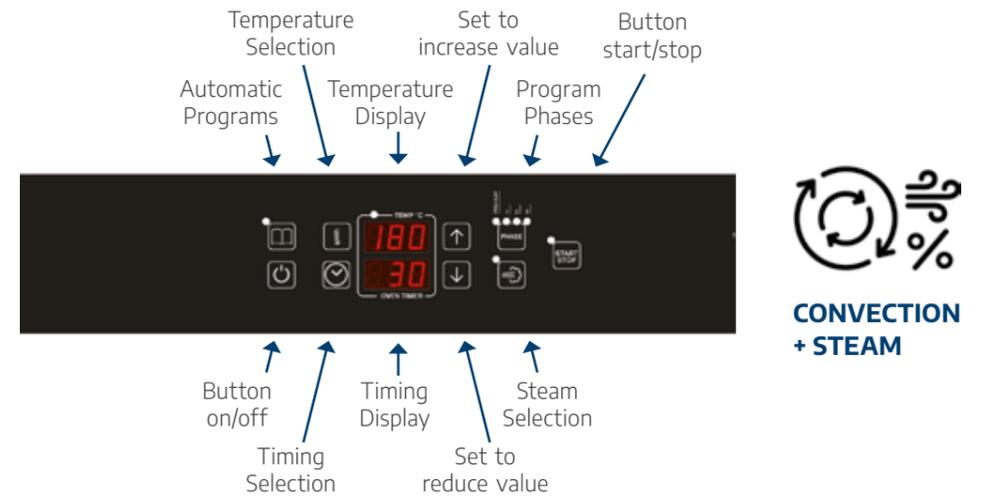

The Support Ovens and the Fast Value line offer a selection of Electric ovens with tilt up door, available with mechanical and digital control and it is possible to choose between models with **convection + grill**, **convection + humidifier** and **convection with steam**. Small but robust, these ovens are ideal for snack bars, pubs and small restaurants.

DISPLAY SUPPORT OVENS

DISPLAY FAST VALUE OVENS

Easy cleaning and maintenance

Beko Professional ovens are equipped with a double-glazed openable door that can be inspected for cleaning and with a cooking chamber with rounded edges for easy cleaning.

The Ovens must be kept always clean at the end of the day.

The **Touch Ovens** are equipped **with 4 automatic washing programs**: Short, Strong, Extra Strong and Rinsing Cycle. With just one touch the oven will be clean and ready for a new working day in the kitchen.

MAXIMUM STURDINESS AND ERGONOMICS

A sturdy and strong oven with ergonomic handle and with the cooking chamber totally made in stainless steel AISI 304.

AFO ET 10DS BP

SAME FOR: AFO ET6DS BP, AFO ET4DS BP

MAIN FEATURES

- Suitable for pastry and gastronomy
- 10 Trays levels, available also with 6 and 4 levels
- Double insertion GN1/1 and 60x40cm
- **3 cooking methods: convection + combi + steam 100%**
- Touch Screen Control
- **Possibility to store up to 1.000 recipes**
- **Cooking at Phase up to 20 different stages**
- **Cooking at Delta t° with Core Probe**
- **Multi Cooking Function**
- **USB Connection and HACCP Control**
- Automatic Washing programs: short, strong, extra strong and rinsing cycle
- Guide with 80mm distance
- Internal lighting
- Reverse fan rotation and double rotation speed
- Preheat and chamber cooling function
- Cooking delay timer function
- 400V- 3N- 50HZ

AFO EM 10SV BP

SAME FOR: AFO EM 6SV BP, AFO EM 4SV BP

MAIN FEATURES

- 10 Trays levels, available also with 6 and 4 levels
- Double insertion GN1/1 and 60x40cm
- **2 cooking methods: convection + steam**
- Mechanical control
- Guide with 75mm distance
- Internal lighting
- 400V- 3N- 50HZ

AFO ED 10DS BP

SAME FOR: AFO ED 6DS BP, AFO ED 4DS BP,
AFO GD 6DS BP

MAIN FEATURES

- Suitable for pastry and gastronomy
- 11 Trays levels, available also with 7 and 5 levels
- Double insertion GN1/1 and 60x40cm
- **3 cooking methods: convection + combi + steam 100%**
- Digital control
- **Possibility to store up to 99 recipes**
- Guide with 75mm distance
- Internal lighting
- Reverse fan rotation and double rotation speed
- Cooking delay timer function
- 400V - 3N- 50HZ
- Available also in Gas version with 7 levels
(gas methan G20/Butane G30/ Propane G31)

AFO ED5SO BP

MAIN FEATURES

- 5 Trays levels
- Double insertion GN1/1 and 60x40cm
- **2 cooking methods: convection + steam**
- Digital control
- **Possibility to store up to 99 recipes**
- **Cooking at Phase up to 4 different stages**
- Guide with 70mm distance
- Internal lighting
- Reverse fan rotation
- Tilt up Door
- 400V- 3N- 50HZ

AFO EM4SO BP

MAIN FEATURES

- 4 Trays levels
- Double insertion GN1/1 and 60x40cm
- **2 cooking methods: convection + steam**
- Mechanical control
- Guide with 70mm distance
- Internal lighting
- Reverse fan rotation
- Tilt up Door
- 400V- 3N- 50HZ

AFO EM 4CH BP

SAME FOR: AFO EM4 BP

MAIN FEATURES

- 4 Trays levels
- Double insertion GN1/1 and 60x40cm for AFO EM4CH
- Double insertion GN2/3 and 46x34cm for AFO EM4
- **2 cooking methods: convection + humidifier for AFO EM4CH**
- **2 cooking methods: convection + ventilation & grill for AFO EM4**
- Mechanical control
- Guide with 70mm distance
- Internal lighting
- Tilt up Door
- 230V- 1N- 50HZ

Microwave

The Beko Professional PRO 25 IX BP / PRO25IX BP Commercial Microwave Oven is ideal for catering and restaurant commercial applications.

Featuring programmable 10 power levels, 10 memory programs as well as 3 cooking stages the Beko Professional PRO 25 IX BP / PRO25IX BP is simple to use and offers a stainless-steel interior and exterior.

It is suitable for light commercial use by caterers in pubs and cafes as well as other outlets including offices and canteen vending.

Jet Start Outstanding reheating speed. The JetStart function boosts the heat inside the oven to the maximum for 30 seconds, providing the ideal temperature to reheat food with high water content such as clear soups or beverages.

Door opening mode: Hinged with handle

PRO 25 IX BP
